Subject: Technical assistance re: Chuitna

Hi Matt,

I'm wondering if you might have a few minutes free today or Monday to talk? Heather suggested I get in touch with you. I'm trying to sort out how all the various plans that PacRim has produced – Fish Protection, Water Management, Compensatory Mitigation, etc – fit in to the various processes and permits. I understand there's a lot of overlap, so we're trying to work out which specifically we'll need to tackle in the upcoming comment period. I'd really appreciate any guidance you could give! I could come by your office this morning or any time on Monday, or talk on the phone or via email – my last day at NARF is Monday, though, so it would be great to talk sometime before then if possible. No problem if not, though, I know you're probably pretty busy.

Thank you,

Shay
